SacValley MedShare

The Health Information Exchange
for California's North Central Valley

P.O. Box 9217
Chico, CA 95927-9217

SacValley MedShare allows your health care providers to share health information across various health care settings.

The benefits to you, as a patient are:

- You could have less paperwork to fill out.
- The emergency room doctor and care team would be able to quickly access your health history.
- Your doctor could access an accurate list of medications in order to prevent harmful drug interactions.
- You may avoid duplicate medical tests.
- A new doctor could review your health history prior to your visit.
- Your doctor could easily access immunization history.
- Your doctor could be warned of potential allergic reactions.
- Your lab results and radiology reports could be easily accessed among your health care providers.
- Specialists you are referred to could have the information they need quickly, easily, and all in one place.
- This is a community service that is free to you, the patient.

The information is safe, the system is HIPAA compliant, and only those providers who need access to the information, can do so.

SVMS is a not-for-profit local health information exchange that is made possible by the contributions of member organizations.

Save Money, Save Time, Save your Life
